

# Custom Trimwork

*What a Beautiful Way to Enhance  
Your Home's Warmth and Value!*

It's amazing how quickly and easily custom trimwork transforms the character of a home. As one of the easiest and most affordable home improvements, decorative woodwork details add value, elegance and splendor like nothing else.

Trimwork, the distinctive architectural details that adorn the finest of homes, gives any bland room charm and personality. No other type of home décor, furnishings, wallcoverings or artwork can finish off a room as effectively as trimwork. Different types of decorative mouldings create various styles, depending upon your home's décor. The variety is wonderful - custom crown moulding, decorative beams, baseboards, wainscoting, chair rails, cornices, door and window casings and more. And whether you prefer a contemporary or traditional look, subtle elegance or a more opulent feel, a professional trimwork carpenter will discover the decorative trim that's right for you.

Yet custom trimwork need not be a complicated or expensive project. Simple additions can dramatically improve the look of a space. To

easily formalize a dining room or entertainment space, consider wainscoting. It's a classic look that has maintained its strong appeal over the years, adding visual interest to blank or boring walls.

Chair rails are another creative option for your walls. Interior designers sometimes choose to apply wallpaper on top and paint beneath or use two different paint colors to emphasize the chair rail details. Another option is to install a picture rail to display artwork or photographs.

When it comes to improving the appearance of your living spaces, knowledgeable interior designers take advantage of one of the largest surfaces in your room - the ceiling. Custom crown moulding can add a subtle sophistication or dramatic flair in styles and sizes suitable for the scale of any space. For an even more grand appearance, coffered ceilings offer the ultimate in style and elegance, all while providing amazing acoustics.

The design possibilities are practically endless. Create a dramatic and impressive entryway or hallway with hand-carved archways, decorate your windows with cornices and adorn

your fireplace mantel and surround with custom moulding. Create a custom family room or home office with the installation of built-in, open shelf bookcases. Even your staircase can have a stately appearance when its handrails and balusters are replaced with elegant new designs.

Trust an experienced fine trimwork craftsman to advise which improvements will have the greatest impact and which type of millwork will complement your décor. When the mouldings are expertly designed and installed, the effect is simply stunning.

Serving New Jersey, Delaware and Pennsylvania, Home Trimwork Finish Carpentry specializes in exquisite, customized trimwork for your home. Home Trimwork's complete remodeling services include kitchen and bath remodeling, hardwood and tile flooring and door replacement.
